MUTO

INSPIRATION

This is Muto.

Improve style while eliminating distractions with our Muto collections. Today's modern work environment includes many open office spaces which create significant challenges in workspace noise and human capital management.

It is well studied that sound absorbent products in workspaces enhance concentration, productivity as well as both physical and psychological well-being. The inspiration for our collection is the word Muto, which is an Italian word that means "without uttering words or sounds, in a mute manner". Serving acoustic and aesthetic purposes, Muto products will ensure some privacy in any dynamic work environment. Through great design, our products follow the ultimate interior design trends – large open spaces – fostering creative collaboration while creating sub-optimal acoustic environments. Desk dividers, free-standing screens, wall or hanging acoustic panels will create a balanced and pleasing layout that reduces unwanted noise in all types of interiors.

WHY PET?

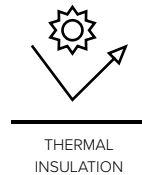

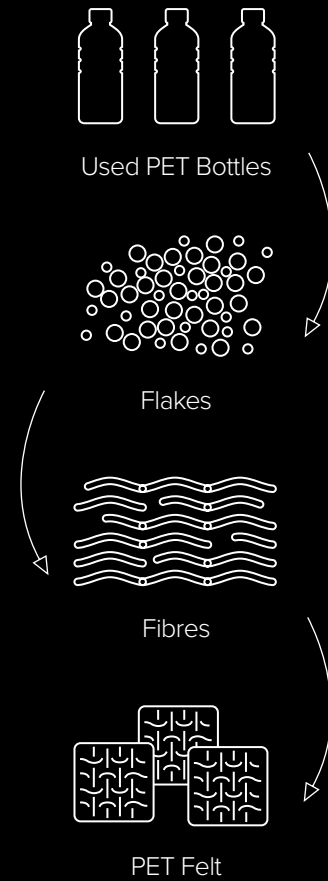

In terms of sustainability, Villa booths feature sound-absorbing panels made of PET, a recycled material that can be repurposed and reused. Panel Composition: 100% polyester fibre, of which a minimum of 60% is recycled polyester. This choice helps minimize waste and reduces the environmental impact, aligning with eco-conscious practices.

Production Process - Made from Bottles

Acoustic panel use discarded plastic bottles as raw materials, made from 100% PET, by needle punching processing. The production process is completely physical & eco-friendly, no waste water, emissions, waste.

How many waste plastic bottles do we use?

1 sheet 1220x2440x20mm of PET panel consumes about 335pcs plastic bottles.

TECHNICAL DATA SHEET

Panel Dimensions	1220x2440mm +/- 5%
Density	300gsm +/- 10%
Thickness	20/22mm
Flame Retardant	EN13501 Class B
Sound Absorption	NRC is 0.5 (with no air gap)
Composition	100% PET
Color	Dark Grey
Certificate	MSDS, SGS, OEKT-100, INTERTEK

Care: Blot excess spills from material quickly. Wipe with a damp cloth. If stain persists, apply small quantities of carpet or upholstery shampoo solution with damp cloth. Blot well with a clean cloth after each application of the solution.

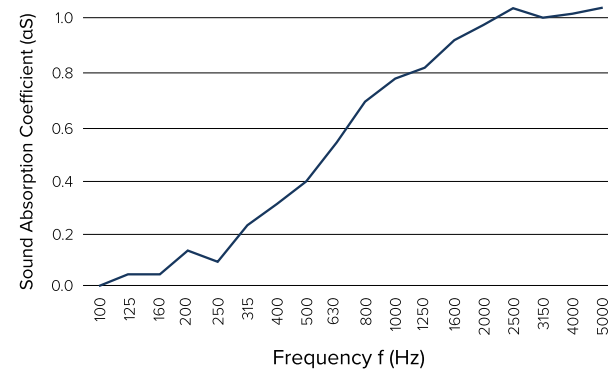

Warning: Avoid excessive amounts of water. Ensure adequate ventilation if the product is likely to be subject to excessive moisture.

Noise Reduction

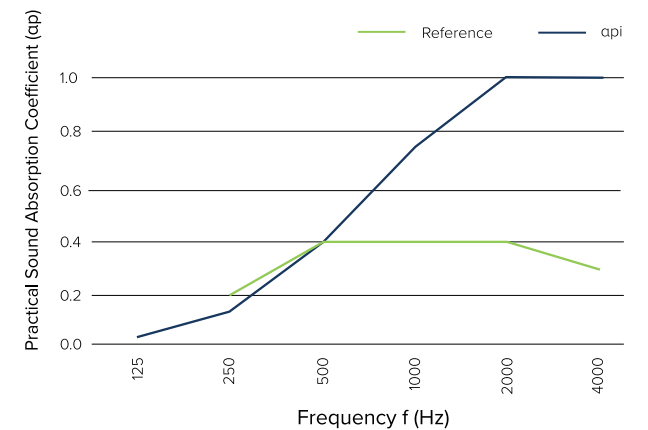

Sculpo panel act as sound-absorbing elements. Designed to improve the acoustic qualities of a space, the PET construction absorbs sound waves, reducing noise levels and creating a more pleasant and productive environment. This creates a quieter, more conducive environment for productivity and positive efficient work environment, contributing to overall well-being and job satisfaction.

The porous nature of the acoustic panels makes them an excellent sound absorbing & thermal insulating material.

Sound absorption coefficient

Sound absorption coefficient with reference curve

- **αw (Weighted Sound Absorption Value) = 0,4 (MH)** - According EN ISO 11654;
- **Class (Absorption Class) = D** - According EN ISO 11654;
- **SAA (Sound Absorption Average) = 0,5** - According ASTM C423 8;
- **NRC=0.5.***

*Noise Reduction Coefficient (NRC) is a numeric representation of how much of the sound energy that hits the product is absorbed. Different materials have different NRC ratings that range from 0.00-1.00. NRC=0.5. At 0.5 NRC, means that only 50% of the sound energy coming in contact with the specific material is absorbed, while the other 50% is being reflected back into the room. It is strongly recommended to use this single number rating in combination with the complete sound absorption coefficient curve.

FREE STANDING SCULPO

Designed to define spaces with visual harmony, this free-standing solution enhances acoustic comfort while maintaining a light and minimal aesthetic. Effortlessly adaptable, it can stand individually or as part of a modular system, allowing flexible and creative configurations for any modern workspace.

- PET material with acoustic properties
- Round Corners
- Robust and lightweight
- Easy to create different panel configurations

With a push-pin surface of 20mm thickness and round corners, the product is designed to have minimalist shapes, giving an elegant, modern and efficient touch to the office space.

Made from eco-friendly materials, offering a ecological solution within contemporary interior design, PET technology is a felt material that doesn't emit toxins into the air.

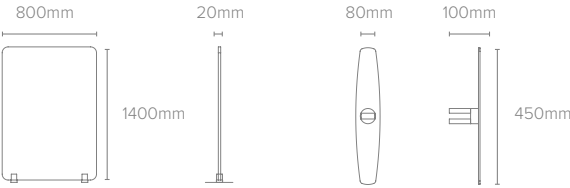

The fixing system is composed of two elegant wood with metal feet, and it is extremely easy to assemble.

DESK SCULPO

A refined solution for defining workspaces, providing both visual separation and acoustic comfort. Defined by simple geometries and clean lines, it offers a pinnable, lightweight, and eco-friendly design that enhances focus while preserving aesthetic balance.

- PET material with acoustic properties
- Round Corners
- Robust and lightweight
- Push-pin surface to highlight relevant information
- Easy to assemble
- Wood and metal clamps included

With a push-pin surface of 20mm thickness and round corners, the product is designed to have minimalist shapes, giving an elegant, modern and efficient touch to the office space.

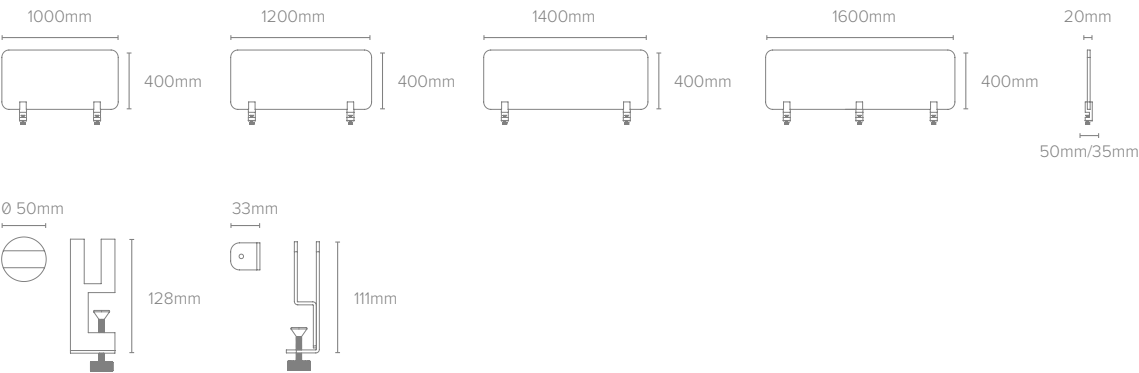

Made from eco-friendly materials, offering a ecological solution within contemporary interior design, PET technology is a felt material that doesn't emit toxins into the air.

The fixing system is composed of two elegant wood with metal or only metal table fittings, very easy to assemble.

WALL SCULPO

Easily installed as a single tile or modular composition, Sculpo Wall combines acoustic comfort with aesthetic versatility, allowing creative color patterns and functional message display in any space.

- PET material with acoustic properties
- Round Corners
- Robust and lightweight
- Easy to create different panel configurations
- Easy to assemble, with included mounting hardware

With a push-pin surface of 20mm thickness, the product is designed to have minimalist shapes, giving an elegant, modern and efficient touch to the office space.

The product provides a wide range of variations in shapes and sizes, making it easy to fit all type of decor.

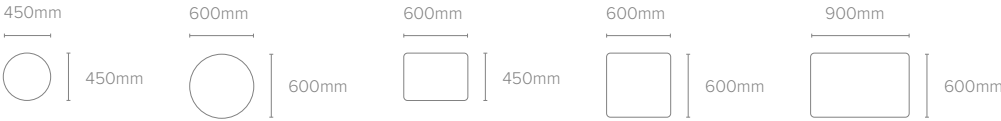

Easy to create different panel configurations. your imagination is the limit. Simple to handle, magnetic fixing system is hidden (8mm).

CEILING SCULPO

Sculpo Ceiling enhances acoustic performance by absorbing and preventing sound waves from ascending through a space. Effortlessly installed, it combines acoustic comfort with a distinct visual identity.

- PET material with acoustic properties
- Round Corners
- Robust and lightweight
- Easy to create different panel configurations
- Adjustable height
- Easy to assemble, with included mounting hardware

With 20mm thickness and round corners, the product is designed to have minimalist shapes, giving an elegant, modern and efficient touch to the office space.

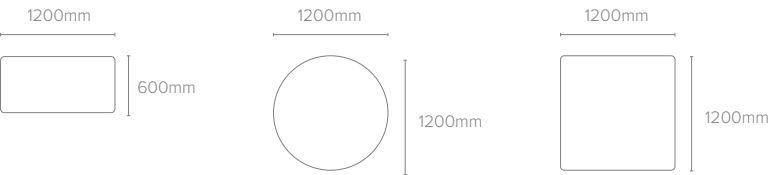

The product provides a wide range of variations in shapes and sizes, possible to combine and achieve ceiling compositions.

With adjustable height cables, it is simple to handle and mount, with included mounting Hardware.

TECHNICAL INFORMATION

Frame | frameless
Material | 100% PET (NRC=0.5)
Fixing systems | adjustable metal hanger

*Also available with square corners
*Customisable sizes

SPD040205372	Ceiling Sculpo Square	1200 x 1200 x 20

MODULAR SCULPO

Ensure space division, privacy, in any dynamic work environment. Individual elements are easily connected to allow infinite flexible and pleasant layouts while improving acoustic comfort. Configure your product, by choosing two or more panels, metal connectors and fixing systems to create different combinations.

- PET material panels, with acoustic properties
- Robust and lightweight
- Versatile metal connectors with multiple shapes.
- Elegant fixing systems featuring metal and wood accents
- Easy to create different panel configurations

Five different connectors can be set up quickly to create different free standing combinations.

Two different feet can be use to create unique modular sound absorption structures.

Hinge connectors are a highly flexible option to create different modular acoustic structures.

VILLA SCULPO

Inspired by the striped haystacks of a Portuguese coastal town, once used as fishing warehouses, this structure reimagines tradition for the modern workspace. Designed for open-plan environments, it serves as an individual workstation or a small meeting room. Crafted from sound-absorbing materials, it fosters acoustic comfort, enabling focus, privacy, and seamless collaboration within a shared space.

- PET material with acoustic properties
- Eco-friendly and fire-retardant panel
- Push-pin surface to highlight relevant information
- Easy to assemble, with included mounting hardware
- Optional Accessory: magnetic Tile

The Villa is available in two versions: open and closed. Allows to create space within space and can be used for several purposes, according to the user needs.

The Tile Villa (optional), allows to take notes, post information and share your ideias. Can be used on any wall of the Villa, or be simply removed, due to its easy panel mount system.

Robust structure composed by beechwood beams and birch plywood cladding with metal details. PET panels are quickly placed/ removed due to its magnetic fixing system.

LCD STAND SCULPO

Where design and technology converge, this mobile yet stable stand elevates digital collaboration, offering acoustic comfort and refined presence in any space.

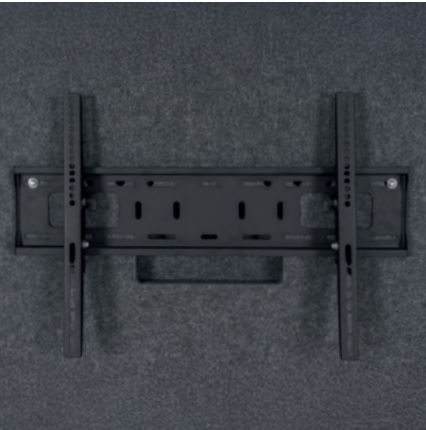

- 20mm PET material with acoustic properties
- Eco-friendly and fire-retardant panel
- Metal structure with epoxy coating and solid beechwood details
- With handles and wheels for easy mobility
- VESA included (holds up to 30kg)
- Hidden cables
- LCD not included (suitable for LCDs up to 65", recommended size is 55")
- Easy to assemble, with included mounting hardware

TECHNICAL INFORMATION

Structure | beechwood and metal
Material | 100% PET (NRC=0.5)

Article code	Name	Size w x h x d mm
SUP3801	LCD Stand Sculpo	1200 x 1600 x 600

This elegant stand is suitable for LCDs up to 65" (the recommended size is 55"). VESA installed. LCD not included.

Robust metal and beechwood structure. Sound-absorbing PET panel with a push-pin surface. The cables are carefully hidden within.

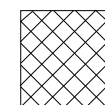

With wheels and handles, it's easy to move the stand around. Ideal for a flexible workplace, fits in open spaces and meeting rooms.

THIS IS CORK

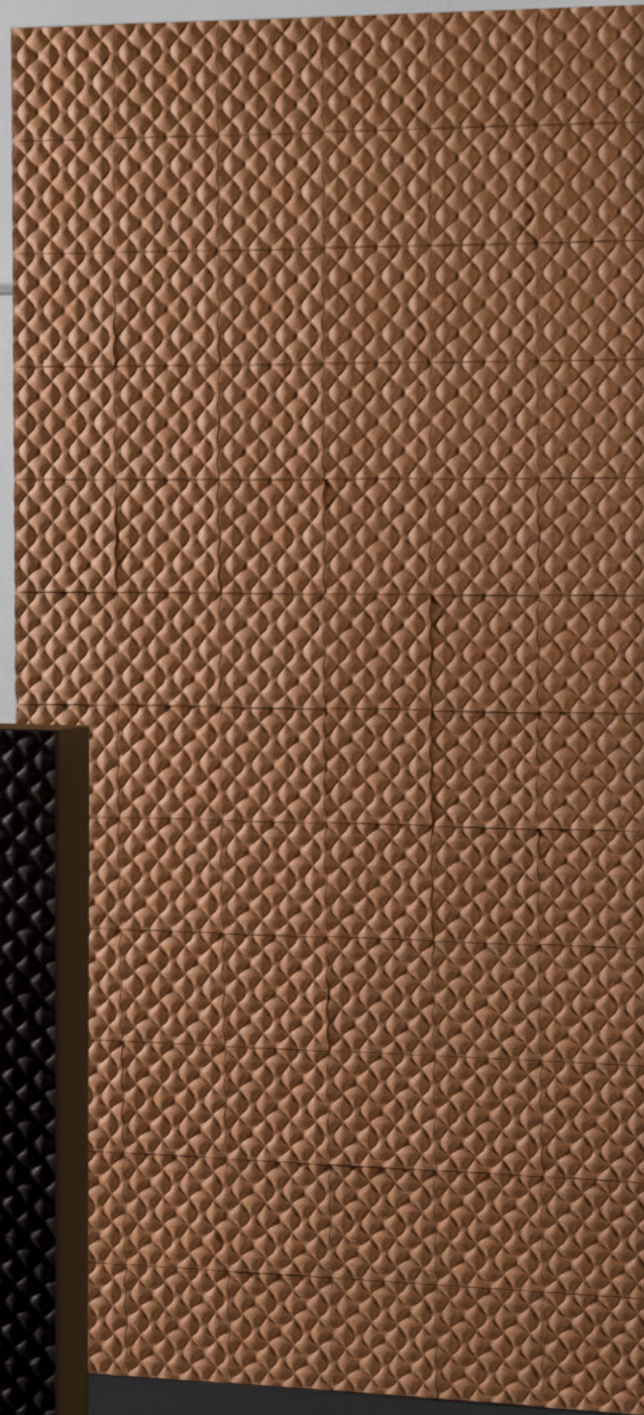

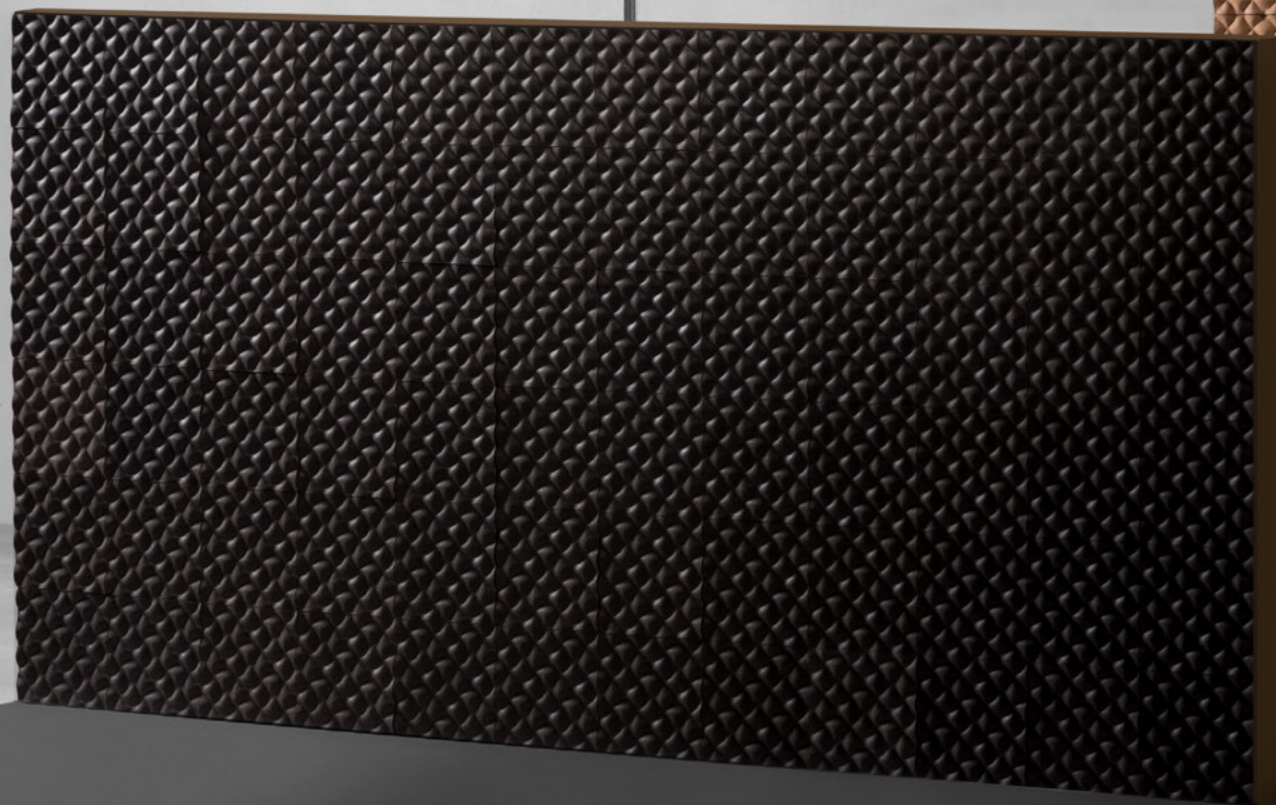

COLLECTION

This is Cork Collection.

Addressing functional, natural and aesthetics issues that concern most particularly Architects and Interior Designers, we have been investing all our expertise developing intelligent practical solutions regarding comfort, wellbeing and sustainability.

Ripple Cork
Tile

RIPPLE CORK TILE

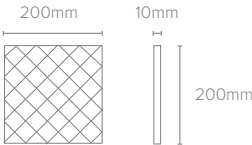

Either as decor or a push-pin bulletin board surface, Ripple Cork Tiles enables you to customize surfaces according to your preference. In addition to cork being an ecological material, it has natural sound absorption and thermal properties. Because the texture is repeated, the material is easy to cut, and the color pallet is coordinated, so you can get completely creative in your application.

- Aesthetic element
- Allows info posting by the use of push-pins
- Natural sound absorbing
- Thermal properties

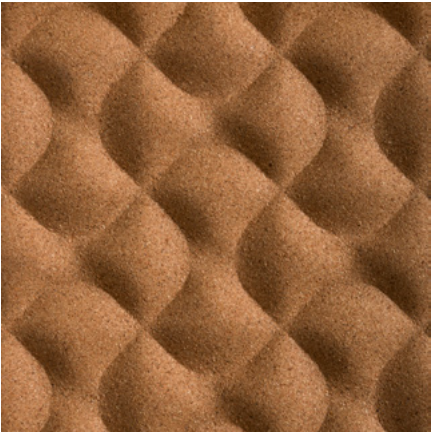

TECHNICAL INFORMATION

Frame | frameless
Surface | cork
Fixing System | adhesive tape

*Available in packs of 12 units only

Article code	Name	Size w x h x d mm
WT0529033	Ripple Cork Tile - Natura Colour	200 x 200 x 10
WT0532033	Ripple Cork Tile - Black	200 x 200 x 10

Molded natural cork, with sound absorption and thermal properties. With a wave design it is a practical and natural decor and also a push-pin surface for important notes.

Frameless and modular tiles allow you to create continuous runs, large covered areas or creative patterns. Easy to assemble.

12 units pack, available in four colours, with adhesive tape included for fast and easy fixing in any space.
